

DEONARAYAN KUMAR

DEVOPS ENGINEER | CI/CD | AUTOMATION | KUBERNETES

+91-8340520797 | Deonarayan0808@gmail.com | linkedin.com/in/deonarayan-kumar

CAREER OBJECTIVE

DevOps Engineer with hands-on enterprise experience in CI/CD, release engineering, Infrastructure as Code (IaC), cloud operations, container orchestration, automation, observability and Linux administration across AWS and Azure. Experienced with Jenkins, Azure DevOps, AWS CodeBuild, Octopus Deploy, Terraform, Docker, Kubernetes, Python, SonarQube, JFrog Artifactory, Prometheus, Grafana and CloudWatch. Supported 10+ application teams, standardised delivery for 50+ repositories, maintained approximately 95% SLA and contributed to release-platform consolidation and recurring licence savings. Targeting DevOps Engineer, Platform Engineer and Cloud DevOps roles focused on CI/CD automation, reliability and scalable infrastructure.

EDUCATION

Bachelor of Technology, Computer Science Engineering

Technocrats Institute of Technology | 2019–2023 | CGPA: 8.92/10

RELEVANT EXPERIENCE

Hexaware Technologies Limited | *Cloud & DevOps Engineer* | Oct 2023 – Present

AXA – Enterprise CI/CD & DevOps Platform | Jan 2025 – Present

- Engineered and supported enterprise CI/CD pipelines and release workflows using Jenkins, Azure DevOps Pipelines, AWS CodeBuild and Octopus Deploy, supporting 10+ application teams.
- Automated build, deployment and operational workflows with Python and Jenkins pipeline development, reducing repetitive manual intervention and improving release consistency.
- Implemented software delivery governance using JFrog Artifactory policies, SonarQube quality gates, licence-compliance checks and standardised pipeline controls.
- Maintained approximately 95% SLA through proactive monitoring, incident troubleshooting, patch management, platform upgrades and Linux administration.
- Automated repository discovery and compliance checks, enabling 50+ codebases to adopt standardised CI/CD workflows and improving quality-scan coverage.
- Redesigned release workflows during Digital.ai deprecation and consolidated release management into Octopus Deploy, contributing to recurring licence savings and infrastructure decommissioning.

Kirkland & Ellis – Azure Cloud Migration | Jan 2024 – Dec 2024

- Supported Azure cloud migration using Terraform-based Infrastructure as Code (IaC), provisioning repeatable Linux virtual machines, networking and storage resources.
- Applied Terraform to improve configuration consistency and reduce manual environment provisioning effort under senior engineering guidance.
- Supported observability implementation with Prometheus and Grafana, including metrics, alert thresholds and performance troubleshooting.

SKILLS

DevOps / CI/CD: Jenkins, Azure DevOps Pipelines, AWS CodeBuild, Octopus Deploy, CI/CD, Build Automation, Release Engineering

Infrastructure as Code: Terraform, Chef, Infrastructure Provisioning, Configuration Standardisation

Containers: Docker, Kubernetes, Deployments, Services, Horizontal Pod Autoscaler (HPA), Liveness/Readiness Probes

Automation: Python, Bash Shell Scripting, Pipeline Automation

Artifact / Quality: JFrog Artifactory, SonarQube, Artifact Governance, Quality Gates

Observability: Prometheus, Grafana, ELK Stack, AWS CloudWatch, Monitoring, Alerting

Cloud: AWS, Microsoft Azure

Systems / SCM: Linux (RHEL/Ubuntu), Windows Server, Git, GitHub

PROJECT HIGHLIGHTS

CI/CD Automation, Compliance & Observability Platform

Built Python-driven Jenkins automation to standardise CI/CD workflows; integrated SonarQube quality gates and JFrog Artifactory policies; developed Grafana dashboards for pipeline health, deployment trends and infrastructure performance.

Kubernetes & Containerised Application Deployment

Containerised applications with Docker and deployed workloads to Kubernetes using Deployments, Services, HPA and liveness/readiness probes; troubleshooted container lifecycle, inter-pod networking and resource-utilisation issues.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)
- PCEP – Certified Entry-Level Python Programmer
